IDI MDS

INCLUDED WITH YOUR MDS SYSTEM

MDS
- MDS tower
- Dual 8” HD mini Preview monitors
- Dual multi-linked monitor arms with vertical travel
- 4 shelves with medical rails
- Cable source kit
- Accessory basket and cable hook
- Power strip and isolation transformer
- Padded monitor protection covers

Router
- IPS1000 router with tablet-based control
- Up to 3 monitor outputs
- Up to 10 Inputs - DVI, SDI, S Video, VGA signals
- Tablet controller (wired or wireless) with articulated arm and charging cradle
- Single, PIP and Split Screen mode

Monitors
- Two 26” HD LED high brightness monitors

Warranty
- Two year warranty

SELECTED OPTIONAL ACCESSORIES

Accessory Basket Kit
Accessory basket for customer supplied foot switch or accessory storage. Requires medical rail shelf. Includes basket and rail clamp.

Endo Shelf
Includes medical rail shelf with bilateral slide-out for MDS or MDS D.

Suction Canister Kit
Includes: 2 suction canister rail clamps and brackets suitable for 3000 ml canister.

Shelf with Keyboard
Kit includes: (A280-0130) medical rail shelf with sliding keyboard carriage for customer supplied keyboard.

CO2 Bracket Kit
Includes pair of CO2 bottle holder brackets for customer supplied gas bottles.

Medical Rail Shelf
Includes medical rails.

Portable multi-modality routing for:
- Hybrid vascular overflow
- Multi-purpose urology rooms
- GI Sites – ERCP, EBUS, and EUS
- Neurosurgery
- General and specialty surgery
Easy monitor positioning
Fully counterbalanced articulating arms for easy manual positioning with up to 36° (91cm) vertical travel and up to 76" (193cm) horizontal extension.

Brilliant 26” HD monitors
High-brightness monitors display over-the-table images in wide-screen, picture-in-picture or split screen modes.

Input image from any video source
Multi-modality imaging viewing from any video source including C-arm fluoros, camera, ultrasound, PACS, patient monitoring.

Simple video routing with touchscreen control
An intuitive touch pad controller makes routing images easy to understand. The layout and color-coded source and destination buttons help eliminate the need for constant staff training.

Preview monitors
Only the MDS provides instant display of the input source, monitor and image configuration you’ve made from the touchscreen on eye-level mini preview monitors which are automatically mirrored on the full-size monitors.

Portable image
Combine MDS with your C-arm and mobile table for a completely portable suite for urology, vascular, GI or other applications.

What you select on the touchscreen...appears on the preview monitors...and on the 26” monitors.

The MDS Advantage
Customers have found the MDS:

Lowers Cost of Ownership
The MDS Installs in hours with no site planning meetings or construction costs that disrupt your Operating Room. The modular design is easy to upgrade as your technology changes.

Improves Patient Access
Over-sized shelves allow customers to consolidate equipment on the MDS. Multi-linked arms bring images to the field and open up the space around the OR table and keep your staff from having to make last minute positioning adjustments.

Increases Room Efficiency
Rooms don’t have to be configured for a given surgical specialty. The mobility of the MDS accommodates your clinical need and can be moved out of the way when not.

Is Safer by Design
The MDS Routing system is controlled by an intuitive color coded touchscreen tablet that makes video routing simple. If the touchscreen tablet is not available, users can select images to display using the router’s control screen.

Superior Adaptability
The MDS patented multi-linked suspension arms navigate around the most cluttered O.R. to optimize monitor placement.
