FITCHBURG, MA April 18, 2018 – Image Diagnostics Inc. (IDI), an industry leader specializing in diagnostic imaging equipment is now the exclusive distributor of SIMEON Medical surgical lighting in the US. A worldwide leader in surgical lighting, SIMEON Medical utilizes patented reflector technology, cutting-edge multi-color or white-light LEDs, and the arrangement of the LEDs in a unique design, providing more light without shadows for ideal lighting conditions in any OR situation. SIMEON sets a new standard for maximum energy efficiency, optimum heat management and long service life as well as simple maintenance and adaptability to future needs. Their lightweight construction, seamlessly enclosed, utilizes SSG safety glass which is scratch-proof, easy-to-clean and provides optimum light transmittance throughout the life of the product. SIMEON meets the highest requirements in environmental hygiene, function, flexibility, reliability and investment security, offering several lighting options and configurations for any OR lighting need.

“We’re proud to partner with SIMEON Medical to provide our customers with the highest quality surgical lighting available,” said Remo Rossi president of Image Diagnostics Inc. “As with all of our products, we strive to offer the most innovative and efficient OR solutions with adaptability to present and future OR needs in mind. SIMEON is the perfect match for us to continue with that mission.”

SIMEON Medical’s patented technology has allowed them to create the first LED surgical lighting with natural white LED’s, outstanding technical specifications and a maximum light intensity of 160.000 lux, offering a power consumption of less than 90 Watts.

10 Year Warranty

In recognition of the groundbreaking innovation and reliability of the Sim. POD design and overall quality built into SIMEON lights, Image Diagnostics is offering an unprecedented 10-year warranty for all Simeon lighting products purchased throughout 2018.

Top benefits of SIMEON Medical surgical lights

- Patented Sim. POD reflector design for shadow free LED lighting
- Minimized heat and power consumption through highly-effective design for thermal transfer and convection, utilizing aluminum and glass
- Scratch-proof safety glass for longevity of product and optimal light transmittance – no plastic effect
- Antibacterial coating on easy to clean glass for optimal environmental hygiene
- Lightweight and easy to maneuver for smooth positioning

Image Diagnostics Inc. is a leading manufacturer of specialized equipment and accessories for surgical and diagnostic imaging applications. Their mobile equipment solutions for these applications, including C-arm compatible tables and mobile video display systems are sold to hospitals and surgery centers globally. IDI products are CE marked and ETL listed to applicable UL, CSA and IEC standards. Founded in 1986, IDI is headquartered in a modern 38,000 sq. ft. facility in Fitchburg, Massachusetts, USA, where IDI products are both designed and manufactured. About SIMEON Medical

Headquartered in Tuttlingen, Germany, SIMEON Medical is one of the world's most sought-after manufacturers of LED surgical lights. Providing a perfectly illuminated medical working environment, SIMEON lighting with its aluminum housing and glass surface is designed for optimal heat management and reduction of overall power consumption. SIMEON Medical utilizes patented Sim. POD technology, an aluminum coated reflector that is formed around a base with 3 LED's for shadow free lighting. The safety glass with antibacterial coating is both hygienic and scratch proof for a 99.999% reduction of germs and optimal light transmittance throughout its lifespan. Ideal for OR planners, all SIMEON products are developed to be adaptable to future needs and provide ideal lighting conditions in any OR situation for any user. For more information, please visit www.simeonmedical.com.

- Adaptable to future needs with an extension arm length of up to 2,000 mm, SIMEON light systems can be easily expanded by adding mounting arms at any time – even after installation
