

IDI ComfortFin™ Stirrups

Lithotomy positioning just got easier *and safer*

ComfortFin 350 stirrups shown on IDI Urology table

Optional stirrup cart

Prepping just got safer

Medial to lateral foot cover closure system keeps dangling straps away from the prep area.

Cleaning just got safer

Silicone straps should be part of your comprehensive Bioburden Reduction Plan. Silicon closure straps are much easier to clean and more durable than VELCRO® style straps¹.

Pressure protection just got better

ComfortFin Stirrups have more protective padding than traditional stirrups. Protect your patients from positioning injuries. The boot padding completely encapsulates the boot shell reducing risk of fascia damage due to contact with hard plastic.

Sizing just got better

Unlike traditional stirrups the ComfortFin 350 and 500 have boots sized to handle today's larger patients. Correct sizing reduces the risk of pressure injuries.
