INTELLIGENT DESIGN ► TANGIBLE OUTCOMES

The Aspect 360 3D Package

The first mobile, fully programmable, motorized table with joystick-control and user definable position presets.

- Unrestricted 360° imaging
- Overcome heavy patient limitations of manual tables with a fully motorized table top and fingertip panning control
- Reduce arm and hand fatigue when positioning patients during imaging - up to 551 lbs./250kg
- Joystick-based motion control of longitudinal and transverse positions
- LCD handset provides advanced motion control with three user programmable position presets
- Carbon fiber accessory rails minimize artifacts and facilitate the attachment of accessories and head support for 3D imaging of the cervical spine
- Short - Low profile base provides excellent C-arm access and positioning
- Optional width extension accessory provides an additional 4"/100mm in table width (2"/50mm per side) for positioning large patients

Aspect 360 Mobile Package Includes:

- Medifa 8000 table with motorized top (120V-230V)
- U.S. accessory rails
- Two patient restraint straps
- One clamp for round rod accessories and one rail adapter

Selected optional accessories:

Width extension
24"/600mm x 2"/50mm

Radiolucent skull clamp

Joystick

Radiolucent head rest system for adults

Multi-position arm support

Footswitch

Arm shield

Armboard

Siderail clamp

Range of table top motions and dimensions

- Width = 21.25" / 540mm wide
- Length = 91.9" / 2335mm long
- 25° Trendelenburg / Reverse
- 20° roll
- Longitudinal travel 11.8" / 300mm
- Transverse travel 7" / 180mm
